Instruction for installing Java for the AP CSA class

Author: Bison

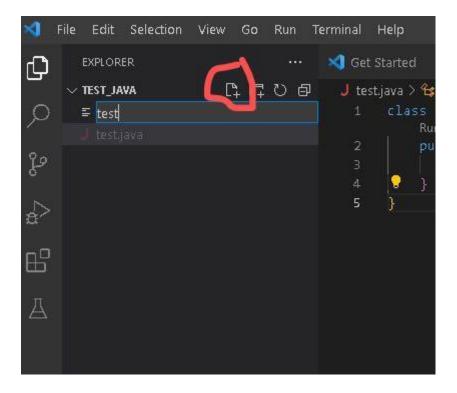

- 1. Click the link: https://code.visualstudio.com/docs/languages/java
- 2. Click the link circled by the red line to download the java and visual studio on your laptop

- 3. Create a folder
- 4. Open visual studio and click the icon "file open folder", and open the folder you just created

5. Click the icon circled by the red line to create your first java file, give it a name called "test.java" (any name ending with .java is fine)

6. Copy and paste the following code into your editor

```
class test{
    public static void main(String[] args) {
        System.out.print("Hello world!");
    }
}
```

7. Click the icon circled by the red line to run your code

```
tentinal Belp testjava - Venuel Studio Code

Code Started Jestjava X

Jestjava - Ye test

1 class test

Ren [Debog

Ren [Debog

System.out.pplnt(Sg "olf");

3 System.out.pplnt(Sg "olf");

5 }
```

8. If you see "Hello world!" get printed, your installation is good now.

```
PROBLEMS OUTPUT DEBUGCONSOLE TERMINAL
